**Experimental Method** 

Crowdsourced Lesson Planning and Organization

Value Proposition

**Selected Interface** 

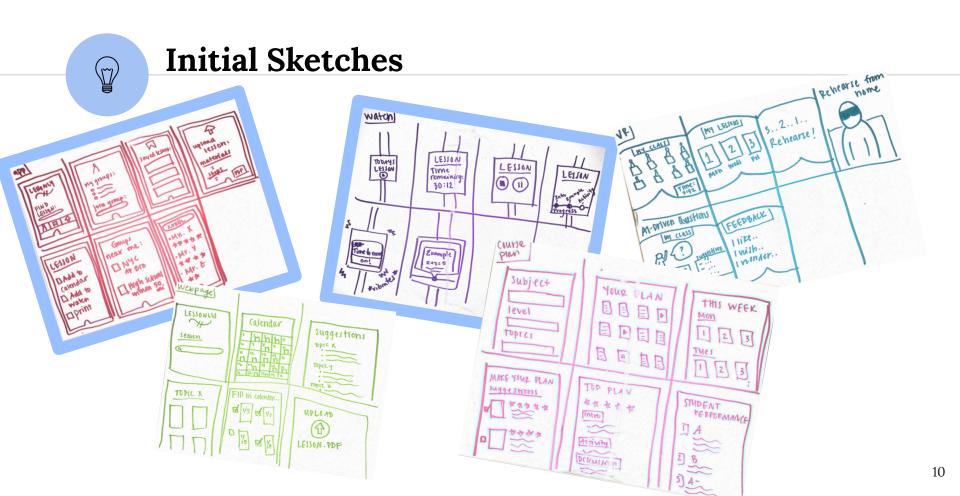

Low-fi Prototype

**Tasks** 

**Experimental Method** 

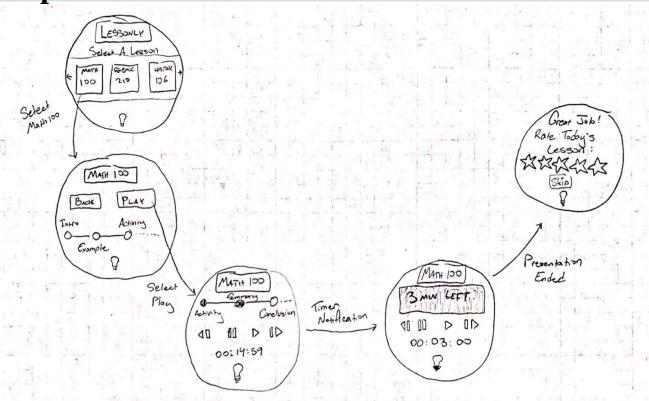

**Top Two** 

#### [Pros]

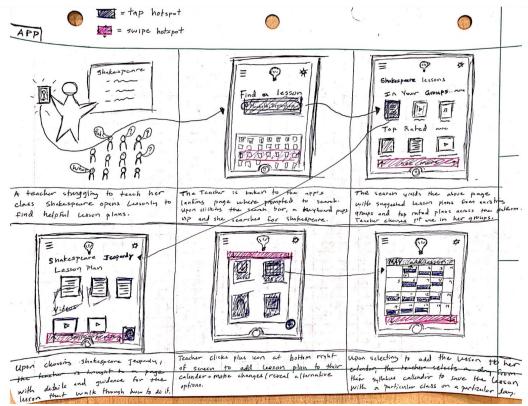

- Many features
- Simple interface
- User friendly
- Seamless lifestyle integration
- Offline potential

#### [Cons]

- Functions like a feature
- Less versatile
- Small screen
- Assistant, not planner

#### **Top Two**

#### [Pros]

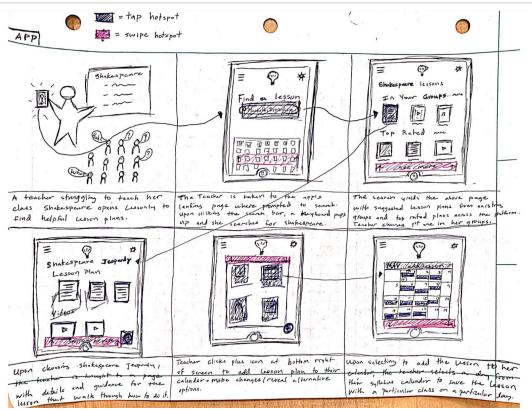

- Many features
- Integrations
- Social/community
- Storing + organizing

#### [Cons]

- Teachers + apps
- Features = overwhelming
- Roaming/data
- Lesson scanning can be frustrating

#### **Selected Interface**

#### Rationale

- High Functionality
- User Friendly

**Low-fi Prototyping** 

Value Proposition

Selected Interface

Low-fi Prototype

#### **Tasks**

Experimental Method Experiment Results

#### **Our Tasks**

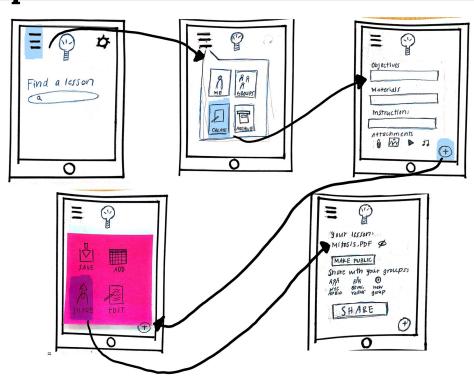

1) **Keep a record** of an effective lesson plan

2) Give feedback to others on a lesson plans

3) Find an excellent lesson plan on short notice

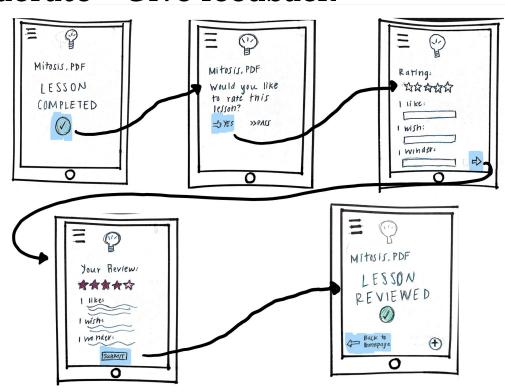

#### Simple - Create a lesson

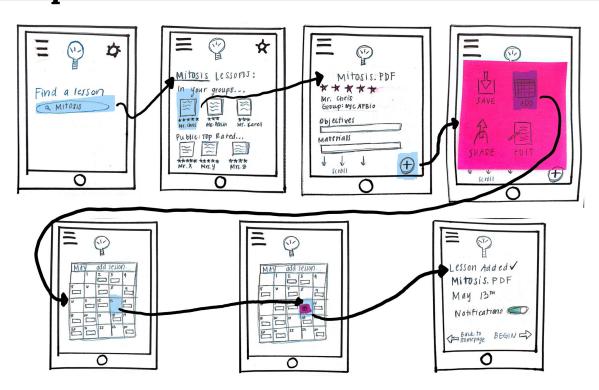

#### **Moderate - Give feedback**

#### Complex - Find a lesson

Low-fi Prototype

Tasks

**Experimental Method** 

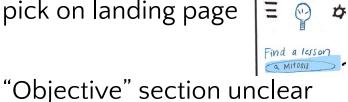

#### **Experiment #1 - Create**

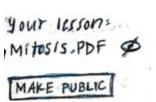

"Add" menu is intuitive and useful

Confused on which icon to pick on landing page

Appreciative of ability to control privacy/share selectively

Public setting caused initial Attrachments confusion

Prominent share button = great

#### **Experiment #2 - Feedback**

Like seeing full summative report

Easy to submit with arrow icons

Overall, icons were a hit and intuitive

Check icon was persistent source of confusion

What about not wanting to rate lesson?

Would you like to rate this lesson?

"I wonder" box = unintuitive

#### Experiment #3 - Find

Star rating system was popular

Uncertainty with no visible keyboard

Once understood, calendar option was a hit

Groups feel safe/effective

Unsure how to submit search

Teachers use first names

Add to calendar initially unintuitive

#### **Suggested UI Changes**

 Landing page needs additional direction to lead user to search bar/menu

2) **Prioritize groups**, don't default to public

3) **Add descriptions** for a few of the progressive icons

## Summary

[Extensive sketching → **app** interface]

[Systematically **test** 3 participants]

- → Overall, participants enjoyed and understood
- → UI needs direction, transparency, intuitive iconography
